Registration Now Open!

To Register, Visit <http://sswlhc.org/events-2/leadershipinstitute/>

The Leadership Institute brings together a distinguished faculty for an intensive interactive program designed to develop and/or enhance the leadership knowledge and skills of participants. The program is designed to incorporate core leadership content with experiential exercises that open up learning about one's own leadership definitions, contexts, assumptions, styles, competencies and areas for development.

Learning Objectives

Upon completion, participants will be able to:

- Appreciate, demonstrate and communicate the unique role of social work leaders and leadership in health care.
- Explore their assumptions about leadership and understand their personal leadership styles and competencies, including strengths and weaknesses.
- Develop core leadership competencies and leverage them to achieve specific goals within their institutions.

"The LI was absolutely fantastic. I can't say enough good things about it. I walked away feeling really inspired with a different view of leadership. I also really appreciated that the facilitators were all social workers, knew well what our work entails, the skills we have based on education and how it positions us to be excellent leaders. I felt that we were speaking the same language which really set this training apart from other leadership trainings."
